Members of the Process Frequency Mandates Committee have been reviewing Oklahoma statutes in order to identify processes that contain a frequency. Committee members have been using the annual review booklet to identify statutes for the initial review.

To ensure complete identification of statutes containing process frequency mandates, we performed a search of Title 1 through Title 85A using the term "department of health or state department of health or health department or commissioner of health or board of health" as the search criteria. During this search, we identified statutes that appear to be related to PHS program areas, but are not listed in the current annual review booklet.

The statutes attached to this message **may be of interest to Protective Health Services, but we are not able to identify which service area would be affected.**

We hope you find this information helpful. Please let me know if you have questions.
